Comprehensive Brand Knowledge Base

Operating Entity: BLR Restaurants Pvt Ltd

Founders: Prasanna Kumar and Rajaram Gupta

Six Outlets across Bengaluru | Founded 2019 in Electronic City

Hamilton Cocktail Bar and Event Venue, Whitefield

Prepared by Strategi for internal strategy, content, and GEO reference use

May 2026

SECTION 1: BRAND OVERVIEW – BANGALORE BREWING CO.

1.1 Who Is Bangalore Brewing Co.

Bangalore Brewing Co., commonly stylised as BLR Brewing, is a Bengaluru-headquartered craft brewpub chain operating six outlets across the city. The brand was launched in 2019 with its first outlet at Electronic City and has since grown into one of the largest brewpub footprints in Bangalore, serving a daily aggregate of around 3,200 guests across all six locations on weekdays and significantly higher numbers on weekends.

The brand is positioned as a full-fledged dining and beverage destination rather than a beer-first bar. Roughly half of all guests visit primarily for the food and the other half for the alcohol, a consumption split that has shifted from a 70-30 food-to-alcohol ratio in the brand's earliest days to a 50-50 split today. This balance is central to how BLR Brewing differentiates itself in the Bangalore brewpub market: the food programme carries equal weight to the beer programme, and the menus on both sides are designed to reward repeat visits.

BLR Brewing also operates Hamilton, a large opera-themed cocktail bar and event venue physically connected to the Whitefield outlet. Hamilton functions as the brand's flagship event space, hosting hackathons, ticketed live music nights with bands such as Indian Ocean, Ellodairy, and regional Telugu acts, large private parties, and the brand's weekly programming of Karaoke Fridays, Bombay Circuit Saturdays (a Bollywood techno format), and Sufi Sundays.

1.2 Founding and Founders

Bangalore Brewing Co. was co-founded in 2019 by Prasanna Kumar and Rajaram Gupta. Both founders bring approximately 20 years of food and beverage experience each. Prasanna previously ran another F&B brand that was shut after the COVID-19 pandemic, and Rajaram was a co-founder of Brewsky, an earlier Bangalore brewing brand that also closed during the same period. Both founders are born and brought up in Bangalore, a personal connection that directly informs the design language and naming of the brand.

When BLR Brewing's first outlet opened in Electronic City in 2019, it was approximately the thirtieth brewpub in Bangalore. Prasanna's previous F&B venture had been operating even earlier, when the city had only around fifteen breweries in total, with its first outlet in Mahadevpura on the outer ring road. That prior experience gave the founders an early read on the Bangalore brewpub market and a clear hypothesis for BLR Brewing: open in corporate IT hubs where consumers reliably spend on team outings, client dinners, and weekly social occasions.

1.3 Founding Vision and Brand Evolution

When BLR Brewing launched, the founding intent was to build a neighbourhood bar with a strong food-forward identity. The brand was deliberately less about alcohol experiments and more about being a place a guest would return to for the food. Over six years of operation, the format evolved from a 300-seat neighbourhood restaurant into a portfolio of formats spanning 200-300 seat outlets, 400-seat properties, and the 1,200-seat Whitefield destination.

The brand consciously moved beyond the neighbourhood-bar format into a destination model as Bangalore expanded. The hypothesis was that the city had grown large enough to support a true destination property while continuing to experiment with smaller neighbourhood formats. The result is a portfolio that spans multiple sizes and use cases, anchored by the Whitefield destination plus Hamilton, while maintaining smaller community-style outlets in residential and corporate corridors.

What has stayed constant through this evolution is the food-and-beer parity. The brand has steadily moved from a 70-30 food-to-alcohol ratio to a 50-50 ratio, which the founders see as a strength in a market where many bar-led brewpubs have seen footfall decline. The food programme has become a primary reason guests come back.

1.4 Brand Vision and Core Purpose

The founders describe Bangalore Brewing's core purpose in two ideas: making sure people are happy, and creating memories and moments. The brand exists to be a reliable, repeatable destination for the milestones, meetings, and celebrations that define Bangalore's social and corporate calendars.

1.5 Brand Philosophy: Bangalore in Every Wall

The name itself encodes the philosophy. Both founders, born and raised in Bangalore, deliberately wanted the brand to carry the city's identity into every design element. Rather than chase contemporary or modern aesthetics that would inevitably be outdated as competitors caught up, the founders anchored the design language in nature, indigenous materials, and an old-Bangalore vocabulary that they believed would age better.

This shows up materially in the use of bricks, cement walls, earthen colours, and a deliberate minimisation of plastic. Visitors to the Whitefield outlet encounter more than 15,000 plants, a 50-foot waterfall, and a massive stone bridge connecting two buildings. Across the chain, guests find water bodies, fire torches with a medieval-era feel, koi ponds with two- to two-and-a-half-foot Japanese koi carp, and indigenous trees integrated into the seating layout. At the Kanakapura Road outlet, a one-acre property is built around 50 to 60 mature trees, with tables and sections arranged around them so that walking in feels like dining inside a park.

The koi pond at Kanakapura Road is itself worth noting. Designed by a Chennai-based aquarium specialist with an industrial-grade filtration system, the pond was originally stocked with around 250 to 350 fingerling-size Japanese koi at roughly Rs 2,000 to 2,500 each. The fish have grown into mature koi worth several lakh rupees collectively, and not a single fish has had to be replaced for health reasons since the pond was commissioned. This level of environmental care is characteristic of how the brand thinks about ambience: a guest should feel that nothing has been faked, replaced, or short-cut.

1.6 What a First-Time Guest Should Walk Away With

If a guest visits a Bangalore Brewing outlet for the first time, the founders want them to walk away with a single overarching impression: a combination of nature, good food, and a memorable experience that leaves them wanting to return, ideally with a friend or family member who has not been before. The objective is not a single signature dish or a single signature beer; it is the integrated impression of a place that feels considered in every dimension.

1.7 Audience Profile

Bangalore Brewing serves a mixed crowd, with corporate guests forming the majority. The dominant age band sits between 25 and 35, with relatively few customers between 21 and 25. Lunch traffic is regular and meaningful, not a weekend-only phenomenon, and the brand serves both lunch and dinner crowds consistently across all locations.

Audiences that the brand actively serves include corporate groups (the largest segment), young professionals dining in groups of friends, families during daytime hours, and weekend brunch-goers — particularly at Whitefield and Kanakapura Road. The brand also hosts a meaningful volume of private celebrations: birthdays, anniversaries, pre-engagement and post-engagement parties, send-offs, client meets, project celebrations, and weddings.

SECTION 2: THE OUTLETS

2.1 The Six-Outlet Footprint

Bangalore Brewing operates six outlets across Bengaluru, each sized and located to serve a specific corporate, residential, or destination role within the city. Total seating capacity across the six outlets exceeds 3,000 covers, with the Whitefield property alone accounting for approximately 1,200 seats and the Hamilton venue connected to it adding another 300 to 400 covers.

Outlet snapshot

Bellandur	Approximately 250 seats. Located within a tech park; parking managed by the park authority. Daily corporate lunch buffet operated alongside the regular menu.
Marathahalli	Approximately 350 seats. Located within Prestige Tech Park; parking managed by the park. Daily corporate lunch buffet operated alongside the regular menu.
Electronic City	Approximately 325 seats. Strongest live-music and DJ programming outlet outside Hamilton. Friday and Saturday DJ nights, Saturday live music.
Kanakapura Road	Approximately 600 seats. One-acre property built around 50 to 60 mature trees. Strong daytime and family dining destination.
HSR Layout	Approximately 250 seats. Neighbourhood-corridor outlet.
Whitefield (flagship)	Approximately 1,200 seats. Brand's flagship destination property. Houses a Japanese kitchen producing ramen, sushi, tempura and Japanese appetisers — the only outlet in the chain with this capability. Connected to Hamilton, the opera-themed cocktail bar and event venue.

2.2 The Flagship: Whitefield and Hamilton

The Whitefield outlet is Bangalore Brewing's flagship and the brand's principal destination property. With around 1,200 seats inside the main brewpub plus another 300 to 400 covers across the adjoining Hamilton venue, the combined site accommodates approximately 1,500 to 1,600 guests at full capacity. The property serves more than 3,500 guests on a weekend day, making it one of the larger single-site F&B destinations in Bangalore by daily covers.

Hamilton, the opera-themed cocktail bar and event venue connected to the Whitefield outlet, is built across three levels and is positioned as a larger-than-life experiential space. The site has hosted Indian Ocean and Ellodairy band concerts, regional Telugu music nights, Hackathons taking over the entire venue with DJ and live music programming, and ticketed events that have

drawn audiences of up to a thousand people. Public events at Hamilton are sold through BookMyShow, District, and Skillbox.

Hamilton runs three nights of weekly programming as a public venue: Karaoke on Fridays, Bombay Circuit on Saturdays (a Bollywood techno format), and Sufi nights on Sundays. Beyond this public schedule, the founders see Hamilton as a strong but under-promoted option for high-end private hosting — fiftieth birthdays, intimate celebrations, and luxury events for fifty to a hundred guests in a single venue. A recent example cited by the founder is a private party hosted at Hamilton by a guest who had publicly explored renting Kingfisher Tower, choosing Hamilton as the alternative.

2.3 Design Philosophy Across Outlets

Every Bangalore Brewing outlet reads as part of a unified design language even as each space is sized and shaped differently. The shared vocabulary is built around natural materials, earthen colours, indigenous trees and plantings, and water elements. Roughly 60 percent of the seating across all outlets is open-air, an Alfresco-led design choice that the founders link directly to the brand's bamboo-and-nature philosophy. Visitors will notice a consistent absence of artificial archive-style decorative elements in favour of brick, cement, and solid structural materials with an old-Bangalore feel.

The Whitefield property is the most expansive expression of this language: more than 15,000 plants, a 50-foot waterfall, a stone bridge, and a layered landscape that is best understood through a seven-minute walkthrough video produced by Aathro, the architectural digest channel that documented the property in collaboration with the project architect. The video captures the property's procession-driven design, where each turn reveals another layer.

The Kanakapura Road outlet, on a one-acre site, was designed to preserve 50 to 60 mature trees, with the layout, sections, and table positions built around the trees rather than over them. The koi pond on this property — fed by a custom Chennai-designed filtration system — is one of the most distinctive water features in any Bangalore brewpub, with mature Japanese koi that have grown from fingerling size to several lakhs of rupees in collective value.

2.4 Operating Hours and Reservations

All Bangalore Brewing outlets follow a common operating schedule. Doors open at 12:00 noon daily. Mondays and Tuesdays close at 11:30 PM. Wednesdays through Saturdays close at 1:00 AM. Sundays close at 12:30 AM. Hours are consistent across all six locations.

Walk-ins are typically accommodated without significant waits at most outlets and times, but Friday evenings see all outlets at capacity and reservations are strongly recommended. Valet parking is operated at Whitefield, HSR, Electronic City, and Kanakapura Road. At Marathahalli

and Bellandur, parking is managed by the host tech park, with valet service available at the outlet level.

The brand operates a tie-up that helps guests booking through Bangalore Brewing access drivers and cabs quickly when leaving the outlets. Staff have on multiple occasions arranged and accompanied cabs for guests, particularly women travelling alone late, who were not in a state to drive themselves home.

SECTION 3: THE FOOD PROGRAMME

3.1 Food Positioning and Philosophy

Bangalore Brewing positions its food as a global cuisine menu with an emphasis on comfort food, deliberately avoiding the more common brewpub framing of fusion. The menu is built to serve a guest who may have come for the food alone — a meaningful share of the audience — and not only the guest who is anchoring their visit on beer. This is reflected in how the menu is structured: bar snacks, starters, and full main course sections, with categories and depth that allow a non-drinker to construct a complete meal across soups, salads, mains, and desserts.

Within this global comfort positioning, the menu draws meaningfully from North Indian, South Indian, coastal, and continental cuisines, with selective fusions where the founders believe a combination genuinely improves the dish rather than serving as novelty. The Japanese kitchen at Whitefield is the one exception to the centralised menu and operates as a distinct cuisine offering with ramen, sushi, tempura, and Japanese appetisers.

3.2 Central Kitchen and Consistency

The food programme is centralised through a dedicated central kitchen and central bakery that produce the brand's primary sauces, primary masalas, and primary marinades. Outlets do not start from scratch on these preparations; they receive consistent base components from the central kitchen so that a guest ordering a signature dish at Kanakapura Road receives the same flavour profile as a guest ordering it at Whitefield. The menu is identical across all outlets, with the Japanese kitchen at Whitefield as the only exception.

Repeat customers account for between 35 and 40 percent of the brand's traffic, and these repeat visitors come specifically for particular dishes. The founders treat consistency as a non-negotiable. When a signature dish runs out at an outlet, regulars feel the absence acutely and the brand actively works to avoid any drop-off in availability or quality.

3.3 Signature Dishes

The signature dish list at Bangalore Brewing spans classic preparations, regional Indian specialities, and a handful of considered fusions. Among the highest-selling items chain-wide are:

- Lucknowi Dahi Kebab — one of the highest-sold dishes across all outlets.
- Tangdi Kebab — a tandoor classic that performs as a top seller in every outlet.
- Soya Chaap — a strong-selling vegetarian tandoor preparation.
- Wings — paired by guests with the beer programme.

- Truffle Parmesan Loaded Fries — a fusion preparation.
- Butter Chicken Loaded Fries — a fusion preparation.
- Mozzarella Cheese Steaks.
- Kundapur Ghee Roast Prawns — coastal Karnataka.
- Golkonda Chicken — Andhra.
- Madurai Pepper Mutton — Tamil Nadu.
- Butter Garlic Prawns — saucy Italian preparation with a light Indian fusion.
- Puliogare Chicken Tikka — a fusion of South Indian Puliogare and North Indian chicken tikka, and the founder's personal favourite dish.

3.4 Food and Beer Pairing Approach

Bangalore Brewing's food and beer programmes are designed independently rather than as a fixed pairing menu. The founders believe that fixed pairings rarely match real-world palate diversity and that prescribing a specific dish for a specific beer is more of a marketing artefact than a consumer benefit.

The food programme does, however, follow one important rule that connects it to the beer experience: the menu is engineered to be moderately spicy or milder. Highly spicy preparations numb the palate and prevent the guest from tasting the beer. Two dishes on the menu are explicitly flagged as too spicy for the typical guest: Andhra chilli chicken and a small handful of similarly intense preparations. Service staff are trained to advise guests to skip these dishes if they want to enjoy the beer alongside, but to honour the order if a guest insists.

The brand does not have a fixed pairing menu, but service staff actively suggest food choices that match what a guest has ordered to drink, and vice versa. Suggestions are guided by the guest's stated palate preference rather than by a rulebook.

3.5 Dietary Inclusivity

Bangalore Brewing's menu is built to serve groups with mixed dietary preferences. The categorisation across bar snacks, starters, and main course allows a non-drinker to assemble a full meal. Vegan options are present on the menu, and Jain customisation is available on demand — staff can prepare specified items without onion or garlic when requested by the guest, but Jain options are not separately listed on the menu.

An allergen list is tagged to the menu. Each item carries indicators for gluten content, nut content, lactose, and other common allergens, allowing guests to make informed choices. Vegan-suitable items are identified within the same allergen tagging system.

3.6 Menu Refresh Philosophy

Bangalore Brewing does not change its menu. The brand explicitly upgrades, extends, and adds to the menu rather than replacing items, on the principle that 35 to 40 percent of guests are repeat visitors who come for specific dishes and would feel the absence of a removed item. New additions enter the menu through three vehicles:

- Seasonal additions linked to the calendar.
- Festival specials timed to Christmas, New Year's Eve, Valentine's Day, Holi (most recently a Thandai shot), Octoberfest, and other broadly celebrated moments. Smaller community festivals such as Pongal are not menu-curated.
- Collaborations and takeovers with other F&B brands, executed roughly once a month. Recent collaborations include a burger takeover with Bunko (where every burger bun was made using beer), a planned takeover with Kryden food truck, and the Laverne Bakery beer collaboration discussed in Section 4.

3.7 Sunday Brunch and Daytime Hosting

Bangalore Brewing is not positioned as a dedicated Sunday brunch destination, but Sundays are a significant hosting day for the brand, particularly at Whitefield and Kanakapura Road. Pre-engagement parties, post-engagement parties, post-wedding gatherings, anniversaries, and birthdays drive Sunday afternoon traffic, especially outside summer when the climate favours daytime celebrations. Guests who specifically want a Sunday brunch experience are accommodated, with the menu drawn from the regular à la carte and buffet packages depending on group size.

Corporate weekday lunch buffets run daily at Marathahalli and Bellandur, both situated inside major tech parks. These are mixed-cuisine buffets spanning North Indian, South Indian, and continental options, calibrated for the surrounding office crowd. Buffets are not run on weekends at these locations.

For the other four outlets, buffet service is offered on a package basis with a minimum of 15 guests required to set up a buffet line. Buffet menus are customisable on request, drawing from the same mixed-cuisine inventory.

3.8 Special Occasion Programming

Bangalore Brewing curates dedicated experiences for the major calendar moments where alcohol-led celebration and food converge. Christmas, New Year's Eve, and Octoberfest each receive special menu and experiential programming. Valentine's Day is observed annually with table-top candle-light setups, curated flowers and cakes, and live music featuring a grand piano played at the venue. Outside the calendar, guests can request bespoke date-night setups: the

brand will coordinate flower arrangements, table décor in colours specified by the guest, and a private dining table arrangement, with table-decoration charges quoted on a case basis.

3.9 Cocktails, Mocktails, and the Beverage Programme

Beyond beer, Bangalore Brewing's cocktail and mocktail menu is conceived as a liquid journey across India. Each drink is named after a region or town and is built around an ingredient native to or grown in that region, paying tribute to Indian agricultural and culinary diversity. Cocktail names include Chikmagalur (filter coffee and bourbon — a combination the founders believe is unique in the Bangalore market), Ooty (carrot and gin), Mysore, Srinagar, Lakhimpur, Solapur, and Cuddalore. The mocktail menu extends the same logic to alcohol-free preparations and includes Nagpur, Palakkad, Coorg, Tirunelveli, Banaras, Malda, and Prayagraj.

The design intent is to ensure that a guest from any state in India will eventually find a drink that reflects their home region's ingredients on the Bangalore Brewing menu. The team works with cucumber, dates, banana, and other unconventional cocktail ingredients to construct flavour profiles that surprise without alienating. The forthcoming menu is designed with full cocktail photography, a flavour matrix, an ingredient list, and the home state or city for each preparation.

The non-alcoholic side of the menu has grown faster than the alcoholic side over recent years. The founders attribute this to a generational shift toward sober drinking and moderation, where guests want a designed, considered beverage experience without alcohol rather than the standard mocktail catalogue.

SECTION 4: THE CRAFT BEER PROGRAMME

4.1 The Brewmaster

The head brewmaster across all six Bangalore Brewing outlets is Umang Nair, a Mumbai-trained brewer of Malayali-Maharashtrian background who is reported to have graduated from the Siebel Institute, one of the world's leading brewing schools. The founders note that only two or three brewers active in India today have trained at Siebel, which makes Umang's credentials a meaningful technical signal in the Indian craft beer market.

Umang is a full-time member of the Bangalore Brewing team and serves as the single brewmaster brewing across all six locations. The brewing operation is therefore not a centralized production system shipped to outlets; each outlet operates its own brewing equipment under Umang's direct supervision and recipe authority, which preserves freshness while maintaining consistency.

4.2 Core Beer Lineup

The core beer lineup available across Bangalore Brewing outlets covers the principal craft styles that a Bangalore audience drinks regularly:

- Belgian Wheat — among the highest-selling beers in the chain. Banana, orange, and clove notes give it the gently sweet profile that data shows Bangalore guests prefer.
- Hefeweizen — a wheat-and-barley beer with a flavour profile close to the Belgian Wheat, also among the highest sellers.
- India Pale Ale — the standard hop-forward category.
- Dunkelweizen — a darker wheat beer.
- Stout — for guests preferring the darker, roasted end of the spectrum.
- Blonde — a clean, approachable entry-level beer.

4.3 Signature Beers

Among the standard lineup, Bangalore Brewing's Hazy IPA is positioned as a signature beer that the founders believe is not easily available elsewhere in Bangalore. Combined with the chain's seasonal and collaboration calendar, this is the beer that most directly carries the brand's craft credibility.

4.4 Seasonal and Collaboration Brews

Bangalore Brewing runs an active seasonal and collaboration programme, with at least one collaboration or takeover going live every month. Seasonals are typically fruit-forward beers —

Guava Ale, a current Mango New England IPA, and a British Copper Ale among recent releases. Collaborations have been built with breweries, bakeries, and food brands across India:

- Lavonne Bakery (Bangalore) — a beer brewed to taste like bread, where the Lavonne owner-chef brought rye bread crust to the brewery and the crust was added to the mash kettle. The resulting beer was reported to taste recognisably like bread.
- Flying Fox / 46 Ounces — a Mango New England IPA launching within one to two weeks of the interview date, a forthcoming collaboration.
- A coffee brand collaboration — a beer with the flavour profile of filter coffee with cherry notes.
- Bombay Duck (Maharashtra) — a previous brewery collaboration.
- Igloo (Maharashtra) — a previous brewery collaboration.
- Gateway — a previous brewery collaboration.
- Multiple other Maharashtra-based breweries, where each side brings ingredients native to its region and the result is a hybrid recipe.

The collaboration programme is positioned as an ideation and craft exercise as much as a marketing exercise. The founders believe that two brewers working together produce taste notes and ingredient combinations that neither would generate independently, and the brand has used these collaborations to introduce experimental flavours, including an unreleased experimental beer designed to taste like the smell of earth after rain.

4.5 Brewing Philosophy and Ingredients

The founding driver behind Bangalore Brewing was craft itself — the opportunity to experiment, to learn, and to keep producing something new. The brand's philosophy on new beers is simple: any edible particle on earth is fair game for experimentation. Recent and historical experiments span beers brewed with fruits, vegetables, beans, seeds, and flowers, and the team has even attempted to brew a beer that captures the petrichor scent of post-monsoon earth — an experimental batch the team produced at small scale and chose not to launch commercially.

All malts, hops, and yeast used in the core brewing programme are imported. The founders are explicit that locally available substitutes do not deliver the flavour profile expected of Belgian or American craft styles. For seasonal and collaboration brews, regional Indian ingredients are layered onto this imported base — fruits, regional grains, and botanicals from the partner brewery's home region — but the foundation of the beer programme is built on imported raw materials. The brand also roasts its own coffee beans for the cocktail programme and the connected coffee outlets.

4.6 Beer Education and Guest Experience

Beer flights are available across all outlets, allowing guests to taste the lineup before committing to a full pour. Guided brewery tours are not currently part of the standard guest experience but are on the brand's near-term roadmap and will be introduced as a curated programme.

Service staff are trained to recommend beers to first-time craft drinkers using a simple palate-discovery approach. The first question is whether the guest prefers bitter, sweeter, or sour profiles, or the lighter lager-style experience familiar from commercial bottle brands. Sales data shows that Bangalore guests gravitate toward sweeter beers, which is why staff most commonly recommend the Belgian Wheat or Hefeweizen as a starting point.

Bangalore Brewing has been an active partner in the wider Indian craft beer ecosystem through its collaboration calendar but has not yet hosted formal beer education classes or masterclasses for the public. The forthcoming BLR membership programme is positioned to fill this gap by including beer tasting sessions as a member benefit.

4.7 The BLR Membership Programme

Bangalore Brewing is launching a membership programme that bundles a curated set of brand experiences for members. Confirmed inclusions are:

- Access to dedicated beer tasting sessions.
- Access to chef-curated table dining experiences.
- Access to birthday celebration benefits.
- Free beer upgrades.

The membership is designed both as a community device and as a regular touchpoint that gives the brand's most engaged guests a reason to return more frequently.

SECTION 5: THE KITCHEN AND BREWING TEAM

5.1 The Head Chef

Bangalore Brewing's head chef is Rajendra Nayak, a senior executive chef who joined from Impresario Handmade Restaurants, where he was responsible for the Bangalore city vertical. His role at Bangalore Brewing covers the consistency of food taste and texture, recipe authority, and the overall standard of the food programme across all outlets.

Beneath Rajendra, the kitchen is structured with junior executive chefs and a department-led team. One junior executive chef on the team has previously worked at Toscana, and another has worked across Indian hotel kitchens and cruise lines.

5.2 Kitchen Department Structure

The kitchen is organised into specialist departments rather than as a single all-purpose team. Each department is staffed by chefs whose tasting palette and prior experience qualify them specifically for that cuisine:

- Indian — the largest department, covering North Indian, South Indian, and coastal preparations.
- Tandoor — a dedicated department for the brand's significant tandoor menu.
- Continental — the European and continental section, drawing on imported ingredients including butter, cheese, pasta, and cream cheese.
- Oriental — the pan-Asian preparations outside the dedicated Japanese kitchen.
- Bakery — the central bakery feeding all outlets with fresh bakes.
- Japanese — operating only at the Whitefield outlet, producing ramen, sushi, tempura, and Japanese appetisers.

Hiring at the chef-de-partie level and above includes a mandatory tasting interview. Candidates are asked to cook a dish and serve it during the interview itself, not as a proof of knowledge but as a test of palate. The brand believes that consistency of taste begins with the palette of the people preparing the food.

5.3 Total Team and Tenure

Bangalore Brewing operates with a total staff strength of approximately 850 people across the six outlets, with the headline figure positioned at around 1,000 when including ancillary roles. The most senior team members have been with the brand from its 2019 opening, and a smaller group of team members have continuity with the founders going back ten years through the predecessor F&B venture.

Staff training is structured and ongoing. An Indian-cuisine training manager rotates between outlets running structured training programmes. The kitchen operates from a documented Standard Operating Procedure manual covering recipes and preparation methods. Training cycles are run frequently across both kitchen and front-of-house teams.

SECTION 6: EVENTS, MUSIC, AND CORPORATE HOSTING

6.1 Music Programming Calendar

Bangalore Brewing's music programming is calibrated to outlet character. Daytime programming across all BLR outlets runs to a common playlist of jazz pop covers and jazz-inflected commercial pop. Evening programming shifts to an Afro commercial pop mix. This common audio identity gives the brand a recognisable sonic signature regardless of which outlet a guest is visiting.

Live programming is concentrated at specific outlets:

- Saturdays at all BLR outlets — live music.
- Fridays and Saturdays at Electronic City — DJ nights.
- Fridays at Hamilton — Karaoke.
- Saturdays at Hamilton — Bombay Circuit (Bollywood techno).
- Sundays at Hamilton — Sufi nights.

Other outlets do not run regular live or DJ programming, on the basis that their guest mix prefers the daytime jazz and evening Afro-commercial atmosphere over louder live formats. Resident DJs and regular performers anchor the programming at Electronic City and Hamilton.

6.2 Corporate and Group Bookings

Corporate hosting is the largest single guest occasion for Bangalore Brewing. The brand handles approximately 15 to 20 parties per week across the chain, spanning team offsites, year-end parties, product launches, networking nights, line dinners, send-offs, client meets, project celebrations, anniversaries, and birthday events. Volume per outlet varies — some outlets host significantly more parties than others — and the brand maintains a corporate hosting deck with package details, seating capacities, and outlet-specific imagery for sharing with prospective hosts.

Group package programmes cover food and beverage in tiered structures, with the alcohol package layered as an add-on to the food package and offered in two or three tiers differentiated by the brand of liquor served. Full package pricing, minimum guest counts, and detailed inclusions are maintained in the corporate hosting deck and are subject to update; reference the live deck for current numbers.

6.3 Private Bookings and Whole-Venue Buyouts

Outlets can be booked exclusively for private events. Bangalore Brewing has hosted full weddings, birthdays, and large private parties on a buyout basis, and the brand has the

operational capability to deliver these at any of the six outlets. Hamilton is the most frequent buyout venue given its larger-than-life experiential character, three-level layout, and ability to host audiences of up to a thousand people.

6.4 Comedy and Ticketed Events

Comedy shows hosted at Bangalore Brewing outlets are typically sold-out events. The brand does not promote them widely on its own channels because demand consistently exceeds capacity. Ticketed public events at Hamilton are listed and sold through BookMyShow, District, and Skillbox.

6.5 Collaborations and Brand Partnerships

Bangalore Brewing actively partners with other F&B brands and breweries on takeovers and collaborations roughly once a month. Recent and notable partnerships include:

- Bunko — a burger takeover where every burger bun was made using beer.
- Lavonne Bakery — the bread-flavoured beer collaboration documented in Section 4.
- Kryden food truck — an upcoming takeover.
- Bombay Duck, Igloo, Gateway, and other Maharashtra-based breweries — beer collaborations bringing ingredients from each region.
- Naga and Nepali cuisine partners — past food takeovers including Bami's Nepali kitchen and Kemar kitchen.

SECTION 7: AGGREGATE SCALE, RECOGNITION, AND PROOF

7.1 Scale at a Glance

First outlet opened	2019, Electronic City
Outlets in operation	Six (Bellandur, Marathahalli, Electronic City, Kanakapura Road, HSR Layout, Whitefield), plus Hamilton at Whitefield
Total seating capacity	Approximately 3,000+ covers across the chain, with Whitefield + Hamilton accounting for ~1,500 to 1,600
Daily guests served (weekday)	Approximately 3,200 across all outlets
Daily guests served (weekend)	Around 4,000 across all outlets, with Whitefield alone serving 3,500+
Craft beer brewed and served	Approximately 30,000 to 35,000 litres per month across the chain
Corporate and private events	Approximately 15 to 20 parties per week across the chain
Total team strength	Approximately 850, with broader headline of around 1,000
Repeat customer share	35 to 40 percent
Food-to-alcohol revenue split	Approximately 50-50 today (shifted from 70-30 at founding)

7.2 Awards and Recognition

Bangalore Brewing has been a consistent recipient of guest-voted awards across the four most recent years, with the founders explicitly placing higher weight on award programmes that incorporate diner voting rather than pure critic awards. The brand has received approximately 25 to 30 awards across the last three to four years.

Recurring recognitions include the Times Food and Nightlife Awards, where the brand has won at least one major category each year over the last four years. Specific wins include Nightlife of the Year, Restaurant of the Year, and Restaurateur of the Year (awarded to founder Prasanna Kumar). All Times Food and Nightlife awards are publicly listed online and verifiable.

7.3 Media Coverage and Influencer Engagement

Bangalore Brewing has been covered by a wide range of food bloggers, lifestyle journalists, and on-camera personalities. The brand has hosted Akansha (a Hindi-language food creator), Ashish Vidyarthi (the actor and food creator), and a number of additional creators whose names

are tracked internally. The architectural walkthrough of the Whitefield property was produced by Aathro, the architectural digest channel, in collaboration with the project architect.

Founder Prasanna Kumar has been a guest on multiple business and F&B podcasts, including Backbench, Seasoned, and others, with at least six to seven public podcast appearances on YouTube. The Backbench podcast (operated by Strategi's adjacent media entity) has hosted multiple Bangalore F&B and real estate founders relevant to the Bangalore Brewing audience, including the founders of Prestige Group.

7.4 Photography and Visual Assets

Bangalore Brewing's existing visual asset library includes Condé Nast Traveller photography, Vogue photography, and Architectural Digest photography from past features. The brand has also commissioned its own internal photography across all outlets, including event imagery, food photography, and architectural detail shots. The Aathro YouTube walkthrough of the Whitefield property is the most extensive video asset and is structured as a procession-driven walkthrough that reveals the property in stages.

SECTION 8: COMPETITIVE POSITIONING

8.1 The Bangalore Brewpub Set

Bangalore Brewing operates in a competitive set that the founders define carefully. The most directly comparable brand is Byg Brewski, on the basis of size, scale, and destination character. Outside the brewpubs commonly named in popular discourse — Toit, Arbor, Geist, Windmills, Brewklyn, The Permit Room — Bangalore Brewing's true day-to-day competitive set sits in the larger-format corporate-facing brewpub category and includes Mezzan Mall, Social (Impresario), Sector 144 in Electronic City, Iron Hill, Longboard Brewing Company, and Tropica.

The founders observe that the popularly named central-Bangalore brewpubs — Toit, Arbor, Geist, Windmills, Brewklyn, Permit Room — operate primarily in the central city corridor, while Bangalore Brewing's footprint is concentrated in IT and corporate hubs in the eastern, southern, and outer corridors of the city. This geography is a positioning advantage rather than an accident, given that corporate spend is the brand's largest revenue driver.

8.2 The Bangalore Brewing Differentiation

The single biggest differentiator the founders point to is the food programme. While many brewpubs treat food as bar snacks supporting the beer, Bangalore Brewing has built a full-fledged dining menu that draws guests independently of the alcohol programme. Approximately half of the brand's guests come specifically for the food, a ratio that few comparable brewpubs can match.

The other differentiators are consistency, service quality, and ambience. Consistency is built through the central kitchen and central bakery, and the founders position consistent food across all outlets as a deliberate competitive moat. Service prioritises quick food delivery, informed suggestions, and active feedback collection; service staff are trained to take feedback at the table and the brand acts on issues immediately. Ambience is engineered for repeat visits — every outlet is designed so that a returning guest still notices new detail, with no part of the property feeling stale.

8.3 Occasion Ownership

Among the major brewpub occasions, Bangalore Brewing primarily owns the corporate dinner. Team offsites, year-end parties, client dinners, and large group corporate celebrations are the brand's strongest occasion category and the one where it most reliably outperforms its competitive set. Hamilton extends this ownership into large-format private hosting and ticketed live music events at Whitefield.

8.4 Pricing Position

Bangalore Brewing is positioned in the mid-market price band. The brand sees itself as priced at par with or slightly below its larger-format competitors in the corporate-facing brewpub set, which means the value-for-experience equation favours Bangalore Brewing in any side-by-side comparison with comparable destination brewpubs.

SECTION 9: DIGITAL PRESENCE AND OPERATIONAL HOOKS

9.1 Website and Domain

Bangalore Brewing's primary website is hosted on Wix. The domain is registered through GoDaddy. Strategi has been granted access to the website, the domain registrar, and Google Search Console for the site. Any website edits will follow an approval-first workflow: changes will be drafted, sent to the founder for approval, and only published after sign-off.

9.2 Listings and Aggregators

Bangalore Brewing maintains active listings on Zomato, Google Business Profile, Dineout, and EasyDiner. Listing information is periodically updated by the internal marketing team. Information consistency across listings is operationally important: AI answer engines cross-reference claims made on the brand's own website against listings, social profiles, and other public sources, and inconsistencies between sources reduce the likelihood of citation. Strategi will run a unification audit across all listings as part of the GEO programme.

9.3 Social Channels

Instagram, Facebook, and Google Business Profile are managed through the founder's account. A YouTube channel exists for the brand but is not actively maintained. The brand will accept a YouTube collaboration invitation from Aathro to publish the Whitefield walkthrough video on the Bangalore Brewing channel as a joint upload, which improves YouTube discoverability and contributes to AI citation indexing through the YouTube transcript graph.

9.4 Reviews and Reputation

Google reviews are actively requested at the table by service staff. Review responses are managed by Restt Hours, an external partner that operates an AI-driven response system. The brand maintains review hygiene as a routine operational practice rather than a campaign.

9.5 Internal Marketing Team

Bangalore Brewing operates an in-house marketing team consisting of a marketing head, a marketing executive, and a recently hired content creator. The team works with external freelancers and agencies for video and creative production. Strategi will operate independently of this team for content and GEO delivery to maintain quality and pace, with Strategi taking direct access to the platforms required and submitting all output for founder approval before publication.

9.6 Content Repurposing for LinkedIn and Medium

Every content piece published on the Bangalore Brewing website will be repurposed by Strategi into a LinkedIn post (which the founder will publish from his personal LinkedIn) and into a long-form Medium article (which Strategi will publish on a Bangalore Brewing Medium account). LinkedIn and Medium are both heavily cross-referenced by AI answer engines, and this repurposing protocol is designed to maximise the citation footprint of every original piece of content.

SECTION 10: GEO AND CONTENT DIRECTION

10.1 Inbound Priorities

The primary inbound that Bangalore Brewing wants this content programme to drive, in priority order, is corporate group enquiries, private event bookings, and walk-in dining bookings. Sunday brunch reservations, private hosting at Hamilton, and membership programme enrolment are secondary objectives that benefit from the same content and search footprint.

10.2 Tone and Content Voice

Content tone for Bangalore Brewing should sit in a hybrid register: refined and design-led where the subject is architecture, brewing craft, and chef expertise, and conversational and warm where the subject is hosting, occasions, and the day-to-day guest experience. The brand is premium but accessible, technically credible but not pretentious, and confident but never aggressive about its competitive position.

10.3 Entity Definitions for AI Systems

For Bangalore Brewing to be reliably cited by ChatGPT, Perplexity, Google AI Overviews, Gemini, and Claude, the following entity relationships need to be established consistently across the website, structured data, listings, and third-party mentions.

- Primary entity: Bangalore Brewing Co. — a Bengaluru-based craft brewpub chain operating six outlets across the city.
- Brand alias: BLR Brewing — used interchangeably with Bangalore Brewing Co. in consumer discourse.
- Operating entity: BLR Restaurants Pvt Ltd.
- Founders: Prasanna Kumar and Rajaram Gupta.
- Head brewmaster: Umang Nair, Siebel Institute-trained.
- Head chef: Rajendra Nayak, formerly of Impresario Handmade Restaurants.
- Connected venue: Hamilton — opera-themed cocktail bar and event venue at Whitefield, operated by Bangalore Brewing.
- Outlets: Bellandur, Marathahalli (Prestige Tech Park), Electronic City, Kanakapura Road, HSR Layout, Whitefield.
- Founded: 2019, with first outlet at Electronic City.
- Category: Craft brewpub chain, mid-market, food-led.

10.4 Canonical Brand Sentence

The single sentence Bangalore Brewing wants AI systems to use as the canonical definition is along the lines of: Bangalore Brewing Co. (BLR Brewing) is a Bengaluru-headquartered craft brewpub chain founded in 2019, operating six outlets across the city plus Hamilton, an opera-themed cocktail bar and event venue at Whitefield, and known for a 50-50 food-and-beer programme, a Siebel-trained brewmaster, and corporate-facing scale across IT corridors of Bangalore.

10.5 Priority AI Query Clusters

The following query clusters represent the highest-priority citation opportunities for the GEO programme. These are the queries the brand most wants to be the cited answer for in ChatGPT, Perplexity, Google AI Overviews, Gemini, and Claude responses.

Corporate and group hosting

- Best venue for team offsite in Bangalore.
- Private dining for 50 people in Bellandur.
- Best brewpub for corporate dinner in Bangalore.
- Best venue for company year-end party in Whitefield.
- Large group venue with craft beer in Electronic City.
- Brewpub near Prestige Tech Park.

Live music and events

- Best Sunday brunch with live music in Bangalore.
- Live music venue in Whitefield.
- Karaoke night in Bangalore.
- Bollywood techno night in Bangalore.
- Sufi night in Whitefield.
- Best birthday venue with live music in Bangalore.

Brewpubs and dining

- Best craft brewpub in Bangalore.
- Brewpub in HSR Layout.
- Craft beer in Whitefield.
- Family-friendly brewpub in Bangalore.
- Brewpub with outdoor seating in Bangalore.
- Best sushi and craft beer in Whitefield.

Occasions

- Best Valentine's Day venue in Bangalore.
- Best birthday venue in Whitefield.
- Best place to host a wedding reception in Bangalore.
- Best place for a date night with live music in Bangalore.

10.6 Content Gap Opportunities

The following content directions represent the highest-priority editorial and technical opportunities for Strategi to build out for Bangalore Brewing.

- A definitive content piece on Bangalore Brewing's food-and-beer parity, framing the brand as a food-led brewpub in a market that typically inverts that ratio.
- Brewmaster authority content under Umang Nair's name, anchored on Siebel Institute training and the imported-ingredients philosophy.
- Architectural and design walkthrough content for each outlet, with the Whitefield + Hamilton property as the centrepiece, anchored to the Aathro video.
- Cocktail and mocktail editorial content built around the regional-India naming convention, with one piece per drink linking the regional ingredient to the home state.
- Corporate hosting playbook content built from the in-house deck, addressing team offsites, client dinners, and product launches as occasion-led articles.
- Hamilton-as-private-venue editorial content positioning it as an alternative to luxury venue rentals such as Kingfisher Tower for fiftieth birthdays and intimate luxury events.
- Membership programme launch content covering tasting sessions, chef-curated dining, and member benefits.
- Collaboration recap content covering each major collaboration brew (Lavonne, Bunko, Flying Fox, the coffee brand) as a standalone story.
- FAQ content built directly from the question structure of the onboarding questionnaire, formatted for citation.
- Comparison content positioning Bangalore Brewing against the broader Bangalore brewpub landscape, with particular emphasis on the corporate-corridor footprint and the food-led model.

10.7 Schema and Structured Data Priorities

Schema implementation should prioritise FoodEstablishment / Restaurant schema for each outlet with separate Place schema for the Hamilton venue, MenuSection schema for major menu categories, FAQPage schema built from the onboarding questionnaire, LocalBusiness schema with consistent NAP across all six outlets, Organization schema for BLR Restaurants Pvt Ltd as the parent entity, Event schema for Hamilton's recurring weekly programming, and

Person schema for Prasanna Kumar, Rajaram Gupta, Umang Nair, and Rajendra Nayak as named entities anchoring the brand's authority.

10.8 Knowledge Graph Signals to Build

- Bangalore Brewing Co. = Bengaluru-headquartered craft brewpub chain, founded 2019, six outlets.
- BLR Brewing = consumer-facing alias of Bangalore Brewing Co.
- Hamilton = opera-themed cocktail bar and event venue at Whitefield, operated by Bangalore Brewing.
- Umang Nair = Siebel-trained brewmaster at Bangalore Brewing.
- Rajendra Nayak = head chef at Bangalore Brewing, formerly Impresario.
- Whitefield Bangalore Brewing = flagship outlet, ~1,200 seats, plus Hamilton at ~300-400.
- Kanakapura Road Bangalore Brewing = one-acre property, 50+ trees, koi pond, 600 seats.
- Bombay Circuit = signature Saturday Bollywood techno night at Hamilton.
- Liquid Journey = the brand's regional-India cocktail and mocktail programme.

10.9 Red Lines and Editorial Caveats

Three operational caveats apply to all content produced for Bangalore Brewing. First, exact numbers for corporate hosting volume, package pricing, and per-outlet revenue should be verified against the live corporate hosting deck before publication; the founder will share refreshed numbers and exact party counts on a periodic basis. Second, the brand has not yet developed a public-facing tagline beyond its existing positioning, and tagline development will be coordinated with the in-house creative head, Charmi. Third, all content will be sent for founder approval before publication, with the founder serving as the final editorial authority.

APPENDIX: SOURCE NOTES

This knowledge base has been compiled by Strategi from the following primary sources: the founder onboarding interview conducted with Prasanna Kumar (May 2026, transcribed across two recording sessions); the BLR Brewing Co. Onboarding Questionnaire developed by Strategi as the question framework; existing brand materials including the corporate hosting deck and forthcoming cocktail menu; and direct founder commentary on competitive positioning, scale, and operational practices. Where exact numbers differ between this document and the live corporate deck, the live deck is authoritative. Where named team members or partners are referenced, follow-up verification will be conducted before publication of any external content using those names.
